📍 Open to relocation

Profile

Passionate about software quality assurance, I specialize in functional, technical, and automated testing. With strong proficiency in tools such as **Postman**, **Selenium**, **Jira**, **Xray**, **Confluence**, **MixPanel** and **Elastic**, I am enthusiastic about joining a dynamic team on a permanent contract, where I can play a key role in optimizing the reliability and efficiency of each developed product.

Professional Experience

QA Tester (Apprenticeship) – Noelse, Paris

Oct 2025 - Sept 2026

French neobank.

- Executed manual tests (functional, confirmation, non-regression, exploratory) and validated **hot-fixes** in pre-release and release environments, ensuring the quality of each production deployment.
- Automated test scenarios using **Selenium/JavaScript** and **Claude Code**, reducing repetitive validation tasks.
- Enhanced bug reports via **DevTools (Inspect → Network)**, accelerating diagnosis and resolution by developers.
- Identified, qualified and documented anomalies in **Jira**, with follow-up until final validation.
- Participated in agile ceremonies (daily, planning) and contributed to quality documentation: test sheets, checklists, test plans and internal guides.

Test and Validation Engineer (Internship) – b:bot, Puteaux

Jan - Jul 2025

Smart machines for plastic bottle recycling.

- Designed a test and execution plan with **Xray**, covering each version of the software, application and machine to prevent regressions.
- Deployed a complete functional and technical testing strategy using **Postman**, **Jira**, **Xray**, **Swagger**, ensuring regression-free releases.
- Reported all bugs and anomalies found during test execution to developers. Performed **API** testing using Postman.
- Proactively monitored deployed systems using **Elastic**, improving responsiveness to anomalies.
- Provided remote assistance and managed technical incidents via **TeamViewer**, enabling fast intervention on deployed machines.

Technical Skills

Testing Tools:

Jira, Xray, Confluence, Cypress, Postman, Playwright, Elastic, Swagger, TeamViewer, ResponsivelyApp.

Web Development:

HTML5, CSS, JavaScript, PHP, PostgreSQL, Bash, Snap!, Python.

Education

Driving innovative projects using Agile methodologies (RS6099) – Agile Scrum. *Orions* 2025 - 2029

Master's Degree in Web Cultures and Professions – *Université Gustave Eiffel* 2025 - 2026

- Web project management: design, development and deployment of interactive multi-platform sites and experiences.
- Proficiency in web languages (HTML, CSS, JavaScript, PHP/SQL) and content management systems (CMS).
- 3-week study abroad in South Korea (Dong-Eui University, Busan) – production of an interactive Franco-Korean web documentary.

Master's Degree in Digital Humanities and Technologies – *Paris 8 University* 2023 - 2025

- Led digital projects at the intersection of technology, society and culture.
- Oversaw and optimized web page quality across technical and UX dimensions.
- Designed accessible, responsive and intuitive interfaces adapted to all types of devices.

Bachelor's Degree in English Literatures and Civilizations, Translation Specialty – *Paris 8 University* 2020 – 2023

Languages

English (C2) – French (C2) – Spanish (B1) – Arabic (C2) – Kabyle (C2) – Portuguese (A1)

Skills and Soft Skills

Strong communication and listening skills – Team spirit – Strong organizational skills – Analytical mindset – Autonomy

Personal Projects

- **Franco-Korean Interactive Web Documentary:** recueil.mastercmw.com

Interests

Travel (Barcelona, Stockholm, Santorini, Athens, Seoul, Busan), sports (bodybuilding, football, swimming), English literature (*Great Expectations*, *The Old Man and the Sea*).
